Re: Ripon High School – Tridium Control Upgrade

Dear Brian:

Thank you for the opportunity to provide a proposal on this project. Unfortunately, due to the existing control system being of a proprietary nature we must decline bidding on this project. The existing American Auto-Matrix BAS is hosted by and integrated into a Tridium/Niagara front-end. While both the American Auto-Matrix and the Tridium are obsolete and/or in need of an upgrade, our solution would be a complete upgrade and replacement.

We appreciate your trust in Quality Controls Service and Solutions to offer a proposal on this project. We would be happy to work with you to provide a solution in the future to replace the obsolete control system.

Sincerely,

John R Schmitz
